THINGS TO KNOW

Get ready for an epic fitting !!

The Skin is a tight very moulding suit ! putting the suit on and off will for sure be a long and laborious step ! 😓

We recommend to undress your Skin inside out.. especially when pulling off hands and feet.

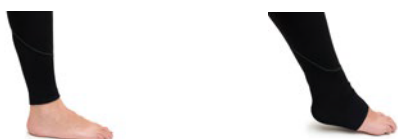

What are the tall versions ??

Only the torso height, arms and legs have been slightly extended. Measurements on width and circumferences remain the same.

To be noted :

The Skin is not fitted with an inside pocket.

The «sock legs» can stop at the ankle level but are better wrapping the heel !
